Summary

Aspiring Software Developer with knowledge in Full-Stack Web Development, Automation Testing, and Machine Learning. Skilled in Python, Django, React, MySQL, Cypress, Postman, and Jest with hands-on experience in developing scalable web applications, REST APIs, and AI/ML projects. Passionate about building user-friendly software solutions and improving application performance through real-time project experience.

Internships

Software Developer Intern – Lattech Company

Dec 2025 – Present

- Worked on real-time software development tasks in a professional project environment and contributed to the successful delivery of application features in the I-Triangle project.
- Performed Automation Testing using **Cypress** by creating and executing end-to-end test scripts, helping improve testing efficiency by **40%**.
- Developed Postman Collections for REST API testing, reducing manual testing time by 35%.
- Wrote unit and integration test cases using **Jest**, achieving approximately **85% test coverage** for key application modules.

Python Django Developer Intern – Amba Software, Hubli

Nov 2024 – Jan 2025

- Gained hands-on experience in full-stack Django development, order management systems, and MySQL database integration.
- Built dynamic and responsive dashboards using Django, HTML, CSS, and Bootstrap to improve user interface efficiency.
- Implemented CRUD operations, authentication modules, and admin dashboard features for efficient data management.
- Developed a Placement Cell Management System for managing student registrations, job postings, application tracking, and placement activities.

Skills

- **Programming:** C , Python , JavaScript ,TypeScript .
- **Frontend:** Angular (HTML, CSS ,TypeScript) ,React Js ,Bootstrap.
- **Backend :** .Net Core 5 , ASP.NET, Fastify.
- **Database :** SQL Server, MySQL.
- **API & Integration :**RESTful APIs, API Integration , Postman.
- **Tools :** Git, GitHub, VS Code.
- **Testing & Automation :** Automation Testing, Jest.

Projects

Sea Animals Classification Using Deep Learning [Github](#)

- Developed a Deep Learning-based Sea Animal Classification system to predict different sea animal species from images.
- Implemented and compared multiple CNN models including **ResNet50**, **MobileNet**, **EfficientNet**, and other transfer learning architectures for high-accuracy prediction.
- Achieved a highest classification accuracy of **91%** by optimizing model training, image preprocessing, and hyperparameters.
- Built the project using Python, **TensorFlow/Keras**, **OpenCV**, and **Flask** for model integration and prediction.

On Road Vehicle Breakdown Assistant

- Developed an On Road Vehicle Breakdown Assistant to provide quick emergency support for vehicle users.
- Built features for nearby service assistance and breakdown request management using Django and MySQL.
- Designed a simple and user-friendly interface to improve user experience and response time.

Education

Master of Computer Applications

Feb 2024 - Oct 2025

- KLE Institute of Technology, VTU

CGPA: 8.1

Bachelor of Science

Sept 2020 - Oct 2023

- KLE P. C. Jabin Science College, Hubli

CGPA: 7.4

Certifications

- Cloud computing [View Certificate](#)

2025
